

# Notes on Scottish Postcode Directory Quality Checking

Gerald Leung

Public Health Scotland

Draft version: March 2, 2022

## Contents

<b>1 Introduction</b>	<b>1</b>
<b>2 Initial Quality Checks</b>	<b>2</b>
<b>3 Lookup Files</b>	<b>3</b>
<b>A Appendix: Data Dictionary</b>	<b>4</b>

## 1 Introduction

In this short document, we summarise the process of the Scottish Postcode Directory (SPD) file checks from the National Records of Scotland (NRS) by the Geospatial Team at Public Health Scotland (PHS). In short, NRS updates SPD files twice a year, around March and September<sup>1</sup>. The Geospatial Team will then conduct quality checks of the updated files and compare any changes with the previous version. They will then produce lookup files in various formats, such as `.csv`. This document focuses on summarising the processes of quality checking (QC) and lookup files production using R. Here we also reproduce a brief summary of the data, which can be found in Appendix A. Full details can be found through the [data dictionary](#) provided by the NRS, or accessed through

```
//PHIBCS/PHI/Referencing & Standards/GPD/1_Geography  
/Scottish Postcode Directory/Source Data/2021_2  
/ISD Data Dictionary_2021-2
```

for the **2021-2** version.

## 2 Initial Quality Checks

The R scripts are located in

```
//PHIBCS/PHI/Referencing & Standards/GPD/5_GitHub/GPD/Geography  
/Scottish Postcode Directory
```

and the Standard Operating Procedures (SOPs) are located in

```
//PHIBCS/PHI/Referencing & Standards/GPD/1_Geography  
/Scottish Postcode Directory/SOPs.
```

The source files can be found in

```
//PHIBCS/PHI/Referencing & Standards/GPD/1_Geography  
/Scottish Postcode Directory/Source Data.
```

They can be accessed through the organisation's VPN. The first QC is done through the R script `1_Check NRS SPD.R`.

In short, this script conducts a general initial QC of the newest version of SPD files and compares changes with the previous version. Figure 1 shows roughly the structure of the script and the QC process.

To start with, all empty rows contained in the files are removed and the files are combined. The user will then record the total number of records and postcode types. Sanity checks are conducted to make sure there are no blank entries for Health Board and Council Areas etc. Checks are then carried out to make sure columns are aligned correctly. For example, between Health Board Area Code and Council Area Code columns. This is generally done by assigning a number to the case when a particular column does not have an expected code that should match with the other column. During 2019, eight postcodes moved from Glasgow City Council to North Lanarkshire Council. Extensive checks are then carried out to make sure there are no blank fields. Checks are also carried out to make sure there are no English voting codes included. Finally, the script makes sure that mappings are done correctly, such as Data Zones and Health Boards.

The script also makes comparisons with previous SPD files. For instance, it checks for changes in postcodes (some have been deleted), different data zones and health boards etc.

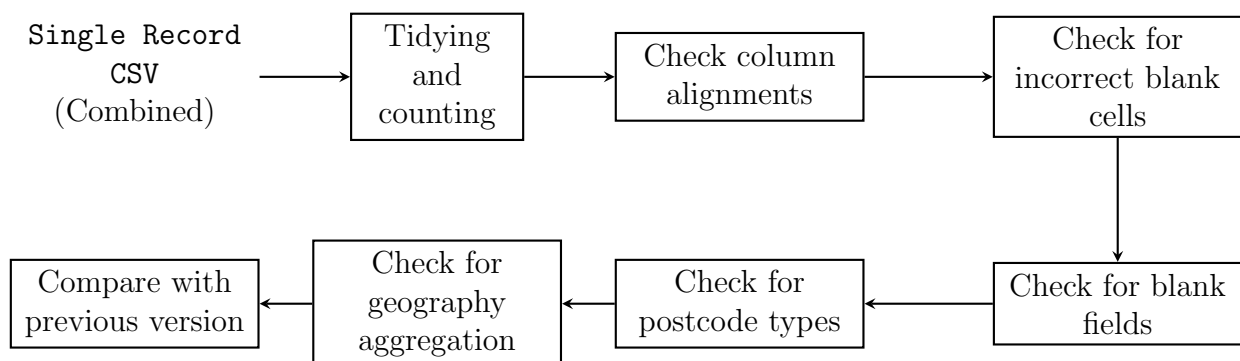

Figure 1: Schematic diagram of the initial QC process.

```
1 checks <- function(variable1, variable2){  
2  
3   spd %>%  
4     mutate(check = case_when(variable1 == "" & variable2 != "" ~ 1,  
5                               variable1 != "" & variable2 == "" ~ 2))  
6  
7   %>%  
8   count(check) %>%  
9   print()  
}
```

### 3 Lookup Files

The next step of the process is to produce lookup files for other uses and analysis within the organisation.

## A Appendix: Data Dictionary

Here we reproduced and summarised the data dictionary provided by the NRS. Table 1 shows the rough definition of the data within `SingleRecord.csv` in order.

Name	Type	Notes
Postcode	Character	The Royal Mail postcode. Consists of area, district, sector and unit. E.g. AB1 0AA.
SplitChar	Character	A, B, C
PostcodeDistrict	Character	Postcode District. E.g. AB1.
PostcodeSector	Character	Postcode Sector. E.g. AB1 0.
DateOfIntroduction	Date	Postcode introduction date. Currently shown as #### instead of a date.
DateOfDeletion	Date	Postcode deletion date. Similarly to date of introduction.
PostcodeType	Character	Small (S) or Large (L).
LinkedSmallUserPostcode	Character	Small User postcode that contains the grid reference of the Large User postcode.
LinkedSmallUserPostcodeSplitChar	Character	A, B, C
Imputed	Character	Whether postcode's higher area values have been imputed.
DeliveryPointCount	Integer	The Royal Mail delivery point count.
DeliveryPointCountNonResidential	Integer	Non-residential delivery point count.
HouseholdCount	Integer	The Royal Mail Household count.
GridReferenceEasting	Character	Grid reference easting.
GridReferenceNorthing	Character	Grid reference northing.
Latitude	Numeric	Coordinates in degrees.
Longitude	Numeric	Coordinates in degrees.
SplitIndicator	Character	Split postcode indicator. Y/N.

CouncilArea2019Code	Character	Identifies a 2019 Council Area.
UKParliamentaryConstituency2005Code	Character	2005 UK Parliamentary Constituency.
ScottishParliamentaryRegion2021Code	Character	2021 Scottish Parliamentary Region.
ScottishParliamentaryConstituency2021Code	Character	2021 Scottish Parliamentary Constituency.
ElectoralWard2019Code	Character	2019 Electoral Ward.
HealthBoardArea2019Code	Character	2019 Health Board.
HealthBoardArea2006Code	Character	2006 Health Board.
HealthBoardArea1995Code	Character	1995 Health Board.
IntegrationAuthority2019Code	Character	2019 Health and Social Care Partnership.
OutputArea2011Code	Character	2011 Census Output Area.
OutputArea2001Code	Character	2001 Census Output Area.
OutputArea1991Code	Character	1991 Census Output Area.
DataZone2011Code	Character	2011 Data Zone built from 2011 Output Areas.
DataZone2001Code	Character	2001 Data Zone built from 2001 Output Areas.
IntermediateZone2011Code	Character	2011 Intermediate Zone built from 2011 Data Zones.
IntermediateZone2001Code	Character	2001 Intermediate Zone built from 2001 Data Zones.
CensusHouseholdCount2011	Integer	2011 Census postcode household count.
CensusPopulationCount2011	Integer	2011 Census postcode residential count.
CensusHouseholdCount2001	Integer	2001 Census postcode household count.
CensusPopulationCount2001	Integer	2001 Census postcode residential count.
CensusHouseholdCount1991	Integer	1991 Census postcode usually resident household count.
CensusPopulationCount1991	Integer	1991 Census postcode residential count.

ScottishIndexOfMultipleDeprivation2020Rank	Character	Rank Data Zones (2011) according to deprivation.
LAU2019Level1Code	Character	European Area Classification Local Administrative Unit (LAU) 2019 level 1. E.g. Council areas.
NUTS2018Level2Code	Character	European Area Classification Nomenclature of Territorial Units for Statistics (NUTS) 2018 level 2.
NUTS2018Level3Code	Character	European Area Classification Nomenclature of Territorial Units for Statistics (NUTS) 2018 level 3.
Locality2016Code	Character	2016 Locality code.
Locality2001Code	Character	2001 Locality code.
Locality1991Code	Character	1991 Locality code.
Settlement2016Code	Character	2016 Settlement code.
Settlement2001Code	Character	2001 Settlement code.
CivilParish1930Code	Character	1930 Civil Parish code.
EnterpriseRegion2008Code	Character	2008 Scottish Enterprise Region code.
Islands2021Code	Character	Island identification code.
LocalGovernmentDistrict1995Code	Character	1995 Local Government District code.
LocalGovernmentDistrict1991Code	Character	1991 Local Government District code.
NationalPark2010Code	Character	2010 National Park code.
RegistrationDistrict2007Code	Character	2019 Council Area (same as Council Area boundaries).
ROACommunityPlanningPartnership2006Code	Character	2006 Regeneration Outcome Area Community Planning Partnerships (CPP) code.
ROALocal2006Code	Character	2006 Regeneration Outcome Area Local code.

StrategicDevelopmentPlanningArea2013Code	Character	2013 Strategic Development Planning Area code.
TravelToWorkArea2011Code	Character	2011 Travel to Work Area code.
UrbanRural6Fold2016Code	Character	Standard definition of rural Scotland following the Scottish Government Urban Rural classification (6 fold).
UrbanRural8Fold2016Code	Character	Similarly to above (8 fold).
GrudLinkIndicator	Character	Whether grid reference has been assigned via GridLink (Y/N).
GridLinkPositionalAccuracy	Character	Positional accuracy of the GridLink grid reference allocated to each postcode. See full dictionary for details.
NeverDigitised	Character	Whether a postcode boundary has been digitised (Y/N).
CouncilArea2011Code	Character	2011 Council Area code.
HealthBoardArea2014Code	Character	2014 Health Board code.
IntegrationAuthority2016Code	Character	2016 Integration Authority code (Health and Social Care Partnership).
CouncilArea2018Code	Character	2018 Council Area code.
HealthBoardArea2018Code	Character	2018 Health Board code.
IntegrationAuthority2018Code	Character	2018 Integration Authority code (Health and Social Care Partnership).
UrbanRural2Fold2016Code	Character	Standard definition of rural Scotland following the Scottish Government Urban Rural classification (2 fold).
UrbanRural3Fold2016Code	Character	Similarly to above (3 fold).
CommunityHealthPartnership2012Code	Character	2012 Community Health Partnership code.
CommunityHealthPartnership2011Code	Character	2011 Community Health Partnership code.

CommunityHealthPartnershipSubAreas2011Code	Character	2011 Community Health Partnership sub sector code.
CommunityHealthPartnership2007Code	Character	2007 Community Health Partnership code.
CommunityHealthPartnership2004Code	Character	2004 Community Health Partnership code.

Table 1: Data dictionary of the SPD file. Reproduced from NRS.
